C. D. Jennings, as Uncle Sam, acts the part to perfection and promises to make a great hit.

The only correct account of the great event appeared in the Kalamazoo Telegraph under a Benton Harbor date. Here it is: "Motormen Liners Saturday horsehipped. Editor J. C. Loftis, editor of the weekly Sun, for publishing a slurring article against Liners."

THERE is little danger that Benton Harbor will spoil, no matter how hot the sun. This morning the propeller E. S. Tice came in with 44,000 barrels of salt for transfer over the Big Four. Later in the day F. P. M. No. 2 brought in a full cargo of the same preservative.

The lecture committee have found in their efforts to accommodate the friends who have requested reserved seats that some who purchased tickets before the matter of reserved seats was suggested are taking exception to the plan and rather than give occasion for any unpleasant feeling they have decided to abandon the idea and give everyone the chance to select any seat they desire in the hall.

The doors will be open tomorrow evening at 7 o'clock and the entertainment will commence at 8 p. m.

It is cheaper to buy a season ticket. You want to hear the Temple quartet, the price is fifty cents; you won't be satisfied unless you hear George Kennan talk of the Russian exiles in Siberia; you will never forgive yourself if you fail to see Lead 7 Powers. Single admissions to these entertainments will cost 50 cents, or the three \$1.50. A season ticket can be bought for a dollar, and besides the three star entertainments mentioned above they admit you to the Lullaby concert and the Jewel Couthout concert company. Better buy a season ticket before tomorrow night.

Niles Oldest Resident Dying. NILES, Dec. 15—Thomas Huston, the oldest male resident here, is dying of old age. He came to Niles in 1832 and established a ferry across the St. Joseph river before the time of bridges and carried the mails and dispatches and from St. Joseph. His early days were passed among the Indians, and he met with many perilous happenings. He was always honorable, and when early history of this section was sought for he could give it.

Foul Play Suspected. BUCHANAN, Dec. 15.—John Taylor, of this township, cashed his pension check Friday. Saturday night he was found lying on the railroad track unconscious with his head out of pocket-book empty. Foul play is suspected as Taylor was seen in suspicious company during the day.

A Card to the Public

Benton Harbor, April 23, '96. DEAR FRIEND:—

As a friend in need is a friend indeed I want to say I found you fifteen years ago when I thought my days were numbered. I was nothing but skin and bones, being all run down with chronic diarrhoea, indigestion and general debility that had been coming upon me for years. I had doctored with local physicians, taking the most powerful medicines but they failed to cure. Having given up all hopes of a cure I went to see you during one of your visits to our town, and I can truly say you saved my life. This is also the belief of my wife and family. I am now thirty-three years old and feel as well as I ever did, only my strength will not hold out as long as a younger man, but I cannot find words to express the gratitude I feel toward you. I have just this to say to any one, man, woman or child who is suffering with my ailment, no matter if your case is a bad one and other physicians have failed to cure you, don't give up until you give Dr. Booth a trial. You may think you can't afford it, but where there's a will there's a way, and the doctor will meet you half way. I know further more if you try him you will always get it, for he always goes the way, for he has climbed to the top of the ladder in his profession. RUPUS BRUNSON.

Dr. Booth will be at Hotel Benton, Benton Harbor, from 4 p. m. December 15, until 8 p. m., December 16.

A great assortment of fresh candies at a low price.

Three children of William and Mrs. O'Donnell were killed and injured and death Saturday by the explosion of a gasoline stove, which tore away part of the house. The report was heard blocks away.

The raise in the price of shingles has resulted in the building of five new mills on the line of the new Detroit & Mackinac railroad and the starting of several idle ones.

South Haven people have had so much trouble in getting the village fire apparatus to fires without great delay that they propose to offer a handsome premium to the person who is the first on hand at the engine house with a team.

Bangor citizens have decided to abandon their proposed oil well after expending \$2,000 and sinking the pipe 1,300 feet. The well fills with strong brine nearly to the top, but the engineering plant is considered unprofitable.

The legal size of mesh for herring nets to be used in Michigan waters is two and one-half inches, but the fishermen of Lake Superior will ask that this size be changed to one and three-quarters inches in nets for use on Lake Superior. They claim that the herring in that lake do not grow to such a size as those of the lower lakes, and that therefore this law is an unjust discrimination against them.

Physicians aver that there are disease and death in storing wooden blocks from old pavements in cellars for fuel. Several cases of typhoid and diphtheria have been traced to this cause. It is well to remember a single decaying cabbage or a bushel of turnips in the basement has poisoned the air of the entire house. Damp cellars alone are sources of disease. Millions of fungi grow in a night upon damp walls, ripen, and pass off in the air and often are the direct source of fatal epidemics. Fire that will dry the walls of the house is the very best of disinfectants. —Chicago Later News.

Fire that will dry the walls of the house is the very best of disinfectants. —Chicago Later News.

Physicians aver that there are disease and death in storing wooden blocks from old pavements in cellars for fuel. Several cases of typhoid and diphtheria have been traced to this cause. It is well to remember a single decaying cabbage or a bushel of turnips in the basement has poisoned the air of the entire house. Damp cellars alone are sources of disease. Millions of fungi grow in a night upon damp walls, ripen, and pass off in the air and often are the direct source of fatal epidemics.
